EDUCATION

Study Program

Sarabhai Institute of Science and Technology, Vellnad.

08/2020 - 05/2024

Courses

- Computer Science and Engineering

PERSONAL PROJECTS

Suspicious Activity Detection in Public Places

- This is a college project to identify the suspicious activity on public places and report it to the authorities.

E-Commerce WebApp

- Proficient in developing dynamic e-commerce web applications leveraging React.js framework, crafted intuitive user interfaces and seamless user experiences for online shopping platforms.

Food Delivery WebApp

- I created a user-friendly food delivery website using React JS. It lets users order and track deliveries easily. I made sure it works well on different devices and loads quickly. I also added features like online payments and location tracking. Working with a team, I turned design ideas into a functional website, following industry standards and working quickly.

Crypto Price Tracking App

- Developed a cryptocurrency price tracking web application using React.js, integrating real-time cryptocurrency data from the CoinGecko API. Implemented features including dynamic price charts and a search bar for individual currency lookup, providing users with an intuitive and interactive experience
